

Synthetic univariate cases: track recovery under confounding

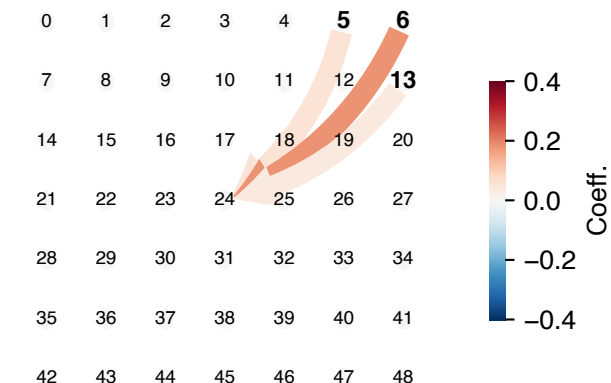

B. Elastic-Net ($\text{Var } 1(t-1) \rightarrow \text{Var } 1(t)$)

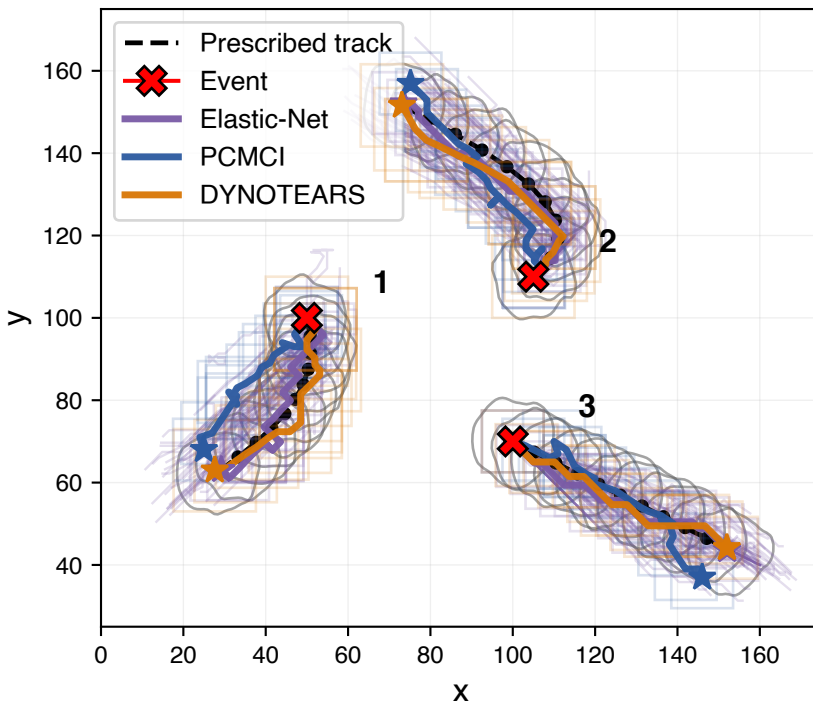

C. PCMCi ($\text{Var } 1(t-1) \rightarrow \text{Var } 1(t)$)

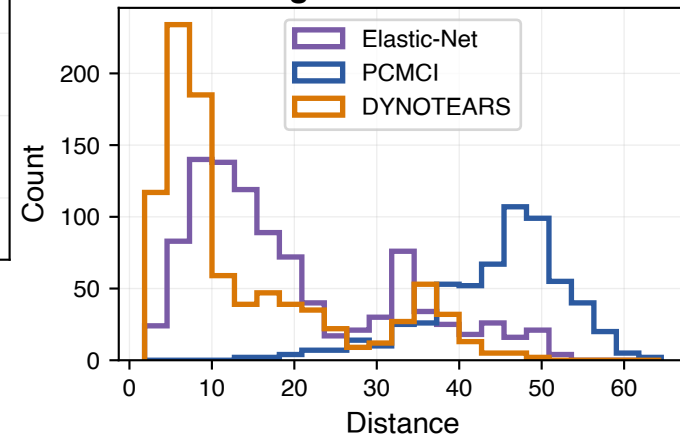

D. DYNOTEARS ($\text{Var } 2(t-1) \rightarrow \text{Var } 1(t)$)

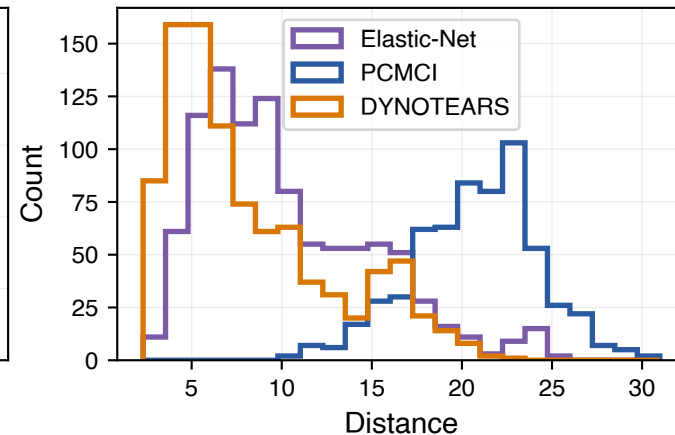

A. Prescribed and recovered tracks

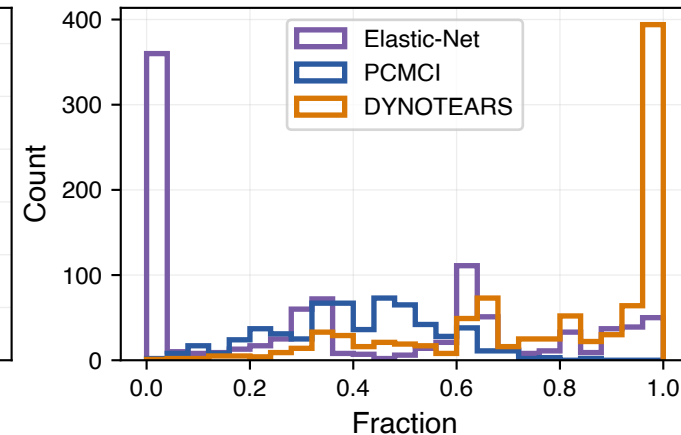

E. Mean origin distance

F. Mean track distance

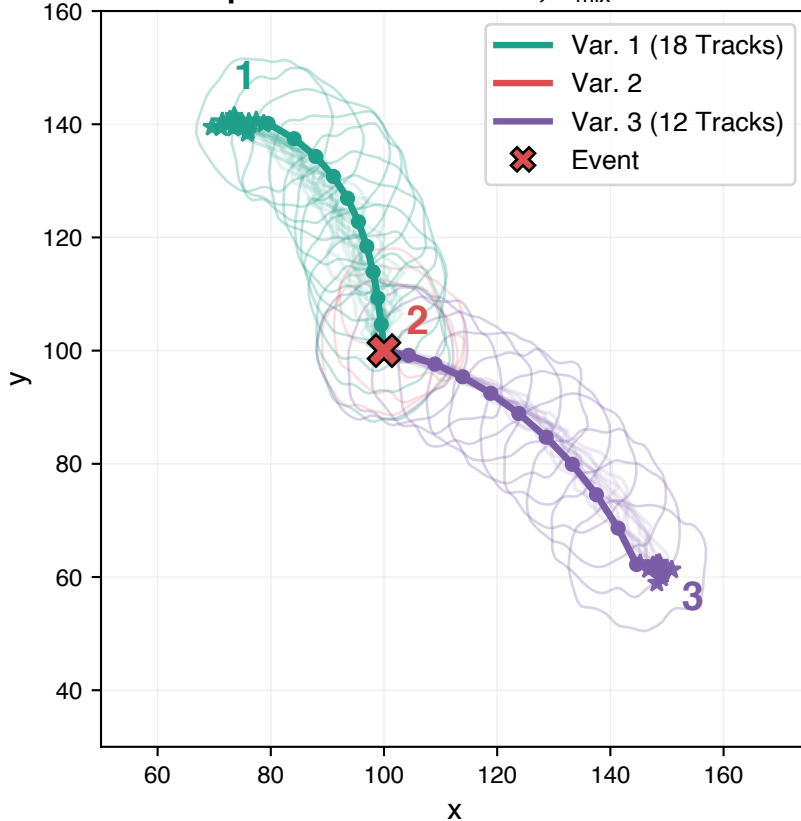

G. Mean Var. 2 fraction

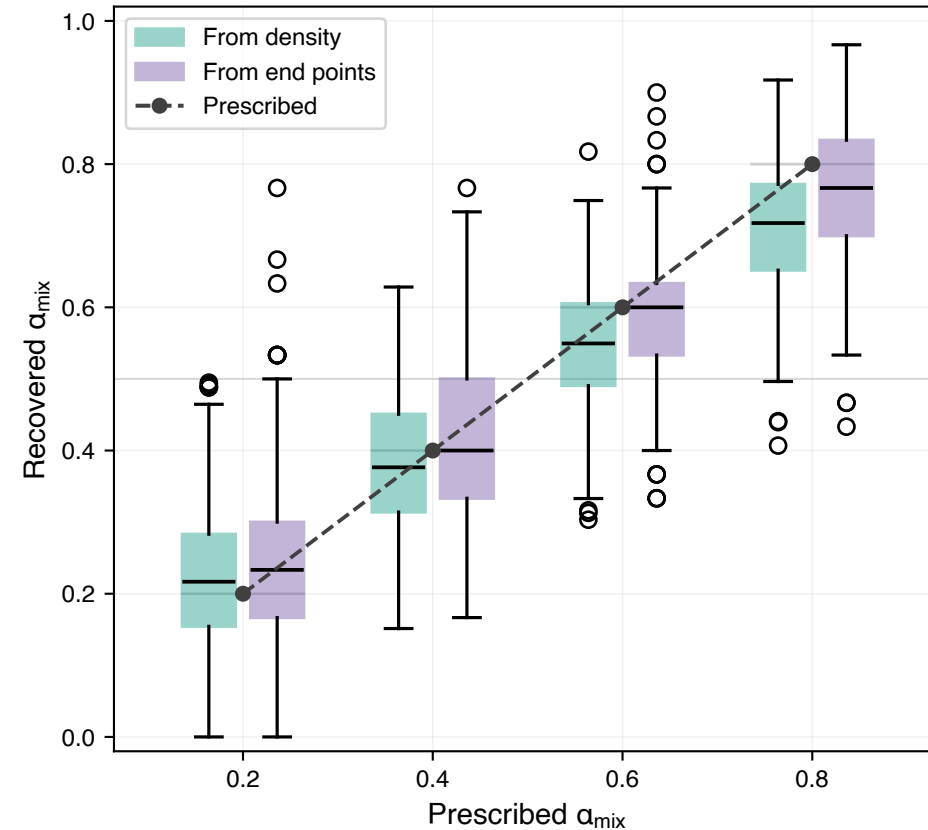

Synthetic multivariate case: track recovery and causal attribution

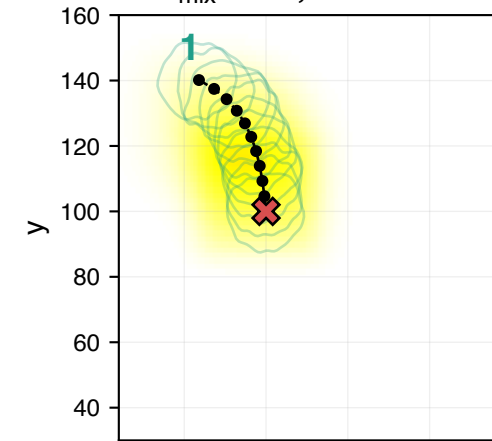

H. Example recovered tracks, $\alpha_{\text{mix}} = 0.6$

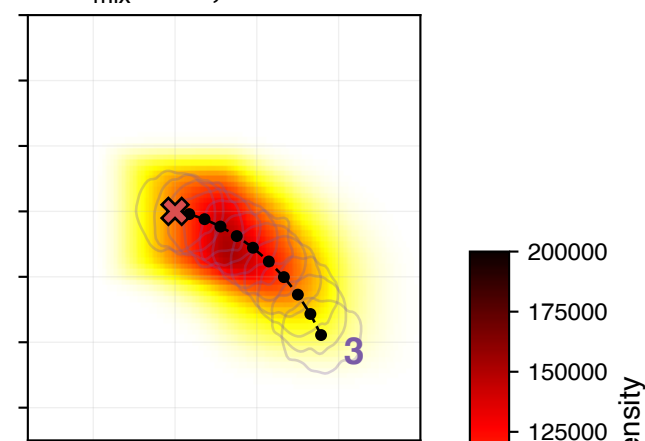

I. Recovered vs. prescribed α_{mix}

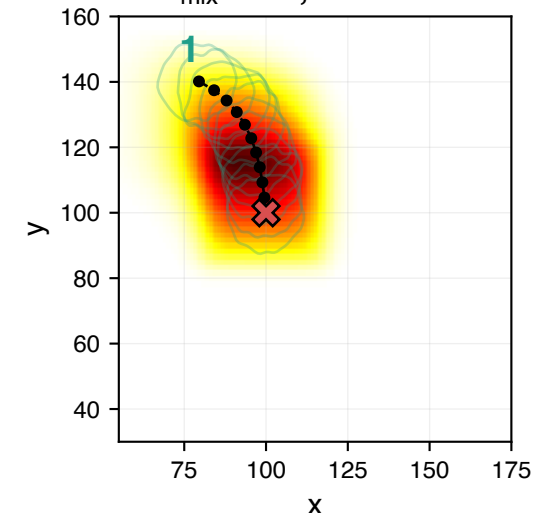

J. $\alpha_{\text{mix}} = 0.2$, Var. 1

K. $\alpha_{\text{mix}} = 0.2$, Var. 3

L. $\alpha_{\text{mix}} = 0.8$, Var. 1

M. $\alpha_{\text{mix}} = 0.8$, Var. 3
